*Manufacturer of soil tillage equipment; rotary tillers; spading machines; mulchers, power harrows, stone burriers and bed formers.*

#### **Claydon Yield-o-Meter Limited**

– Newmarket, Suffolk England –

Web: [www.claydondrill.com](http://www.claydondrill.com)

Spencer Claydon, Director

*The Claydon family have been farming at Gaines Hall in the east of the UK since the early 1900s. In 1980, third generation farmer Jeff Claydon invented the first yield monitoring device to be fitted inside a combine harvester. The company Claydon Yield-o-Meter Ltd was founded. Since then, Claydon have designed and brought to market an entire crop establishment system – Claydon OptiTill®. Their patented Claydon two-tine direct drill makes it much more cost-effective, faster and reliable to establish crops directly into stubble, min-tilled or fully cultivated soils. The Claydon drill promotes deep rooted, stronger, healthier and higher yielding crops. Stubble management tools include the Claydon Straw Harrow, TerraStar light cultivator and TerraBlade inter-row hoe. Cambridge Rolls complete the Claydon range. What makes Claydon products unique is the fact that they are developed on a working farm by a working farmer. Proven in over 30 countries worldwide, working on all types of soil and in all conditions, the patented Claydon Opti-Till System is sustainable farming for the future. [www.claydondrill.com](http://www.claydondrill.com)*

#### **Supertino**

– Saluzzo (CN) Italy –

Web: [www.supertino.it](http://www.supertino.it)

Carlo Dho

*Founded in 1960 by Augusto Supertino as a private company Supertino until today has never stopped its growth. Thanks to the knowledge of the founder about the agricultural world, the company started to grow during the years answering at best to the needs of the farmers. In 1983 sons Franco and Gianluigi started to work in the company and the range of products has been extended. Today Supertino propose on the market a large variety of machines for harvesting, livestock and distribution. Innovative products that permit to fit better on the market. The company currently operates on a covered area of 15.000 square meters, in which each sector operates through production lines. The ability to diversify the products is definitely the strong point of Supertino. This is possible by developing the products directly with dealers and farmers, then selecting the most suitable solutions to the needs of the users. Direct contact with customers allows the staff of Supertino to improve and innovate products according to the demands of the market. All this attention to programming and evolution enabled the company to be competitive both in the national and international markets. Export accounts at the moment for about 60% of the turnover, focused on the European and extra-European markets, where Supertino is well known through participation at all most important international fairs.*
